

PROJECT REVIEW REPORT

Project ID	292
Project Name	150 MW grid connected Wind Power based electricity generation project in Gujarat, India
Program(s)	VCS
Verification Period	01-July-2021 to 31-December-2021
Project Proponent	BLP Vayu (Project 1) Private Limited
Methodology	ACM0002: Grid-connected electricity generation from renewable sources - Version 19.0
Sectoral Scope(s)	Scope 1 - Energy industries (renewable / non-renewable sources)
Validation/Verification Body (VVB)	LGAI Technological Center, S.A.(Applus+ Certification)
Assessment Criteria	VCS Standard, v4.2,ACM0002
Date of First Issue	26 May 2022
Date of Final Issue	27 June 2022

Summary:

An accuracy review of the 150 MW grid connected Wind Power based electricity generation project in Gujarat, India (VCS ID 292) verification approval request has been conducted by Verra in accordance with Section 4.3 of the Registration and Issuance Process.

The accuracy review has raised one assessment finding, detailed below. The VVB, in coordination with the project proponent, is hereby required to provide a response to the assessment findings presented in Section 2. The one assessment finding must be addressed to the satisfaction of Verra.

This project review report will be made publicly available. Confidential information may be provided as separate attachments.

1. ASSESSMENT FINDINGS

Finding 1

Section 4.1 of the Verification Report states “Assessment team concludes the following:

d. The GHG emission reductions or removals generated by the project have not included in an emissions trading program or any other mechanism that includes GHG allowance trading/16/.

f. The project is registered under VCS only.”,

The VCS project 292 is registered under CDM (ID: 2347), according to the project description, monitoring report, and verification report.

The VVB is requested to provide a correction to section 4.1 of the verification report (points d and f of the conclusion).

Furthermore, regarding point d of the conclusion of section 4.1 of the verification report, the VVB is further requested to provide a statement if the ERR in this verification period is not claimed under the CDM and not double-counted.

VVB Response:

The section 4.1 of the FVR is corrected as information about CDM project registration is included and it is confirmed that ERR in this verification period is not claimed under the CDM and not double-counted. This has been cross-verified from CDM project view page and confirm correct and hence accepted.

Verra Response:

Finding 1 is now closed. The VVB has corrected section 4.1 of the Verification Report.

2. MINOR FINDINGS

There is no minor finding.

3. ASSESSMENT CONCLUSION

On 26 May 2022, Verra completed the review of the VCS verification approval request for Project 292, 150 MW grid-connected Wind Power based electricity generation project in Gujarat, India, the results of which can be found above. The project review report was sent to the PP and the VVB. with one assessment finding.

On 27 May 2022, Verra has closed all of the findings. The project may proceed with issuance.
