

VCS PROJECT REVIEW REPORT

Project ID	1346
Project Name	49.5 MW Wind Power Project by FFCEL in Pakistan
Project Proponent	FFC Energy Limited
Methodology	ACM002 – version 15
Sectoral Scope(s)	1 - Energy industries (renewable / non-renewable sources)
Validation/Verification Body (VVB)	BUREAU VERITAS CERTIFICATION HOLDING SAS
Registry	Markit

Assessment Criteria	VCS Standard, version 3.4
Date of First Issue	April 07th, 2015
Date of Final Issue	

Summary:

An accuracy review of the issuance request for project 49.5 MW Wind Power Project by FFCEL in Pakistan has been conducted by VCS in accordance with Section 4.3 of the *Registration and Issuance Process*.

The accuracy review has raised 1 assessment finding and 1 minor finding, detailed below. The VVB, in coordination with the project proponent, is hereby required to provide a response to the assessment finding presented in section 1. The assessment finding must be addressed to the satisfaction of VCS. The VVB need not to address the minor finding(s) during this review. Please note though that where VCS finds consistent minor findings by the VVB in future reviews, minor findings shall be escalated to assessment findings.

This findings report may be made publically available, confidential information may be provided as separate attachments.

1 ASSESSMENT FINDINGS

Finding 1

Section 2.1.5 of the VCS Verification Report Template version 3 requires that the Verifier Provide details of any outstanding forward action requests (FARs) raised during the verification, for the benefit of subsequent project audits. In the Summary of the Verification Report, it is stated that 1 FAR has been raised, but such FAR is not included in the Appendix 1. The VVB is therefore requested that the FAR is included in Appendix 1 for the benefit of subsequent audits.

VVB Response:

FAR 1 has now been mentioned clearly in Appendix 1 of VCS Verification Report.

VCS Response:

FAR 1 has been added to Appendix 1 of the Verification Report, and the finding is closed.

2 MINOR FINDINGS

Finding 1

Section 4.2 of VCS Verification Report Template version 3 requires that, when assessing the accuracy of GHG emissions reductions, the Verifier is required to identify the data and parameters used to calculate the GHG emission reductions and removals. Even though such data and parameters have been mentioned in the text of the Verification Report, they are not consolidated in a single section of the report, nor listed altogether. For future verifications, the VVB is requested to list all data and parameters in a single section of the report.

3 ASSESSMENT CONCLUSION

Finding 1 has been closed with the inclusion of FAR 1 into Appendix 1. The project can proceed to issuance.
