Chairman & Managing Director  
B-50, Sector-80, Phase-II, Noisa-201305  
Uttar Pradesh  
India

Dear Mr. Gopal Sitaram Jiwrajka,

This letter is in reference to your exemption request submitted to Verra on 9 October 2020. It is our understanding that you are requesting an exemption from 4.1.20(20) of the *VCS Standard, v4.0* for project ID 269, *6.25 MW Wind Power Generation project of Salora International*, section 4.1.20(20) of the *VCS Standard, v4.0* requires project rotate VVBs after six consecutive years of emission reductions or removals verifications.

Based on the information provided to Verra, it is understood that the project faces substantially increased costs in order to conduct more than one verification, thus making verification not economically viable. Given this, Salora International Ltd. has requested contract one VVB for the verification of the period 1 August 2009 to 30 July 2016, for project ID 269, *6.25 MW Wind Power Generation project of Salora International*.

Considering the particular circumstances leading to this request, and the background information presented, Verra is able to grant the project proponent, Salora International Ltd., an exemption from Section 4.1.20(20) of the *VCS Standard, v4.0* for verification approval request for project ID 269, *6.25 MW Wind Power Generation project of Salora International*, thus permitting the project to contract one VVB for the verification of seven (7) consecutive years. Please note, exemptions are granted by Verra on a case-by-case basis and do not form the basis of, or set a precedent for, future exemption request approvals or denials.

When requesting verification approval, the project proponent must present a copy of this letter to the registry administrator. This letter will be uploaded to the Verra Registry as a public document.

Sincerely,

A handwritten signature in black ink, appearing to read "Andrew Beauchamp".

Andrew Beauchamp  
Interim Program Manager  
Verra
