

PROJECT REVIEW REPORT

Project ID	298
Project Name	<i>Aryan Coal 15 MW Wind Project in Maharashtra, India</i>
Program(s)	VCS
Verification Period	<i>01-January-2013 to 27-March-2016</i>
Project Proponent	<i>Ayan Coal</i>
Methodology	<i>AMS I.D.</i>
Sectoral Scope(s)	<i>1. Energy Industries</i>
Validation/Verification Body (VVB)	<i>APPLUS</i>

Assessment Criteria	<i>VCS Standard, v4.0, AMS I.D.</i>
Date of First Issue	26 July 2021
Date of Final Issue	10 August 2021

Summary:

An accuracy review of the Aryan Coal 15 MW Wind Project in Maharashtra, India request has been conducted by Verra in accordance with Section 4.3 of the *Registration and Issuance Process*.

The accuracy review has raised one assessment findings and no minor findings, detailed below. The VVB, in coordination with the project proponent, is hereby required to provide a response to the assessment findings presented in Section 1. The one assessment findings must be addressed to the satisfaction of Verra.

This project review report will be made publicly available. Confidential information may be provided as separate attachments.

1. ASSESSMENT FINDINGS

Finding 1

Section 1.5 of the monitoring report states that the project start date is 29 September 2005 as this is “the earliest commission date for the WTF in the project activity.”

The VCS document *Program Definitions, v4.1* defines start date as “the date on which the project began generating GHG emission reductions or removals.”

The project proponent is requested to clarify the start date of the project activity, and the VVB is requested to assess this update accordingly.

VVB Response:

Start date of the project activity is 29-September-2005 which is the date of commissioning of the 4 WTGs from the project activity & thus from this date on which project activity started generating emission reductions. Assessment team checked the commissioning dates of the WTGs and found start date to be correct & inline with VCS standard version 4.1.. The MR has been updated to add a footnote for this clarification and the FVR has been further elaborated in this sense in the Summary Section.

Verra Response:

The VVB has clarified the project start date above as 29 September 2005. This finding is now closed, and no further response is required.

2. MINOR FINDINGS

There were no minor findings identified in this report.

3. ASSESSMENT CONCLUSION

On 26 July 2021, Verra conducted a review of *Aryan Coal 15 MW Wind Project in Maharashtra, India* the results of which may be found above.

On 10 August 2021, Verra closed all findings, and no further response is required.
