## Summary:

A completeness review of the *Bundled Solar Power Project by Mahindra Susten Private Limited* verification approval request has been conducted by Verra in accordance with Section 4.3 of the *Registration and Issuance Process*.

The completeness review has raised 1 assessment finding and no minor findings, detailed below. The project proponent is hereby required to provide a response to the assessment findings presented in Section 1. The assessment finding must be addressed to the satisfaction of Verra.

This project review report will be made publicly available. Confidential information may be provided as separate attachments.

## 1. ASSESSMENT FINDINGS

### Finding 1

Section 3.3 of the Verification Report: VCS Version 4.0 template requires the VVB to identify any project description deviations applied to the project and describe the steps taken to validate each deviation.

Section 3.2 of the Monitoring Report describes 4 project description deviations. Section 3.3 of the verification reports only identifies and validates 3 project description deviations.

The VVB is requested to update the section 3.3 of the Verification report all the 4 project description deviations described in the monitoring report and related information for this section.

#### **VVB Response:**

Section 3.3 of the verification report is now updated for project description deviation 4. It involves change in meter details which were already updated in Annexure 4 of monitoring report ver 3. Verification team confirms that the energy meter details mention are correct, verified and accepted.

#### **Verra Response:**

Section 3.3 of the Verification report has been updated with all the four project description deviations described in the monitoring report and related information for this section. This finding is now closed, and no further response is required.

## 2. MINOR FINDINGS

No minor findings were raised.
