Dear Natasha,

I would like to apologise, our instructions were incorrect, therefore your VPAs in this POA not be subjected to this rule.

We will initiate the review as per the confirmed date.

Please let me know if there is anything else I can do.

Dear Ella,

Allow me to point you to para 2.1.4 of this document:

- https://globalgoals.goldstandard.org/standards/RU_2022-The-SDG-Impact-Tool_v2.pdf

[THE SDG IMPACT TOOL - Gold Standard](https://globalgoals.goldstandard.org/standards/RU_2022-The-SDG-Impact-Tool_v2.pdf)

Climate Security and Sustainable Development RULE UPDATE THE SDG IMPACT TOOL
PUBLICATION DATE 14.03.2022 VERSION 2.0 RELATED DOCUMENTS – Principles and
Requirements

globalgoals.goldstandard.org

It is clearly stated that "**The SDG Tool application is optional and not mandatory for the following projects.** a. Design certified projects and VPAs/CPAs until the end of the ongoing Crediting Period (after which application is mandatory) and b. **New VPAs/CPAs that will be included in design certified PoAs until the end of the ongoing Crediting Period of the PoA.** Such projects may apply the SDG tool on a **voluntary basis** by making applicable changes in the monitoring plan by submitting a design change request at the time of next issuance."

Our POA 10789 was registered in October 2021, and hence all VPAs included or planned to be included in it are now not required to provide this SDG tool until the renewal of CP for the PoA.

I would request that all our VPAs in this POA not be subjected to this rule or subjected to review delays waiting for BURN to adhere to this requirement.

Looking forward to hearing from you.

Best,

Natasha Otolo

Dear Natasha,

For GS10789, VPA 42 and VPA 47: Efficient and Clean Cooking for households, we would like to inform you that we note the project seems to be missing the SDG tool. Please upload these ASAP for the reviews to proceed.

Let me know if there is anything I can do.
