THIS DEED WITNESSES as follows:

1. INTERPRETATION

1.1 In this Deed:

"Project" means "Energy from renewables", (VCSR160); The project activity is the installation of two Wind Energy Generators (WEGs) with a capacity of 1.25 MW each. The locations of the WEGs are in Ranjangaon village, Sakri taluk, and Dhandane village, Nandurbar Taluk of Dhule district, Maharashtra, India. Other than the both WEGs, the project activity consists of the transformers, the metering equipments for each generator and the corresponding substations for both the WEGs till the point of evacuation.

The project activity is transforming wind energy into electricity and is not consuming any fuel for its continuing operation and has no emissions directly related to the electricity production. Since the operation of WEGs does not emit any kind of GHG emissions or any kind of air pollutants, the electricity produced that is being exported to the grid is a clean energy. Overall, the project activity is reducing the GHG emissions that would have occurred in the power plants (fossil fuel based) in the connected electricity system.

"Project Crediting Period" means for non-AFOLU (Agriculture, Forestry and Other Land Use) Projects and Agricultural Land Management projects focusing exclusively on emissions reductions of N₂O, CH₄ and/or fossil-derived CO₂, a maximum of 10 years which may be renewed at most two times, and for AFOLU Projects other than such Agricultural Land Management projects, a minimum of 20 years up to a maximum of 100 years;

"Reduction" means a reduction or removal of one tonne of CO₂e caused by the activities of a Project during the Project Crediting Period;
