Project 1935, Hubei Hongshan IFM (conversion of logged to protected forest) Project: VCS Verification approval and CCB Verification approval request denied

Monitoring period: 01-07-2019 to 30 09-2023

Dear Zhao Jinlan and Xiongjie Zhou,

Verra has not accepted the above project request. A new request can be submitted as described below. In the meantime, the project status has been updated to *Verification approval request denied* in the VCS Program and Verification approval request denied in the CCB Program. The procedure for project request denial and submission of any new request is described in Section 4.3, *Registration and Issuance Process, v4.5*.

Verra has deemed that the validation/verification body (VVB) has not appropriately assessed and/or fully described how it has assessed the project's conformance with the VCS and CCB Program rules. The project documentation is therefore deemed incomplete, of insufficient quality, and/or does not conform with the program rules. Verra has shared further details with you separately.

Next steps

The VVB must address the issues identified. The project proponent/ authorized representative may then submit a new project request, as follows:

1. Upload the revised project documents to the Verra Registry,
2. Submit a CCB verification public comment period request via email to registry@verra.org.
3. Submit a new project request via email to registry@verra.org.
4. Pay the *Project verification*¹ review fee.

The new request will be processed according to Section 4.3.1, *Registration and Issuance Process, v4.5*.

This letter will be made public on the Verra Registry.

Sincerely,
Verra

¹ Excluding prepayment fee which is credited against future issuances
