<b>Title of Project</b>	Nhon Hoa 2 Wind Power Project
<b>Version number of the SCR</b>	<a href="#">1.21.1</a>
<b>Completion date of version</b>	<del>065/03/2022</del> <a href="#">05/12/2021</a>
<b>Time of First Submission Date</b>	10/10/2021
<b>Start Date of the Project</b>	07/12/2020
<b>Date of Meeting (s)</b>	TBU
<b>Project Cycle:</b>	<input type="checkbox"/> Regular <input checked="" type="checkbox"/> Retroactive

### SECTION A. INFORMATION MADE AVAILABLE TO STAKEHOLDERS

#### A.1. A non-technical summary of the project

>>

##### “Nhon Hoa 2 wind power project” non-technical description

The Nhon Hoa 2 wind power project activity involves the construction of 12 wind turbines with total capacity of 50 MW, a 63 MVA transformer station and 220 kV transmission line. The purpose of the project activity is to generate power using renewable energy source and export to the national grid by utilizing wind energy. The generated electricity with an estimated annual amount of 164.405 GWh will be supplied to the national grid via a newly constructed transmission line from the plant to a transformer station.

The project will reduce the emission of greenhouse gases by replacing electricity generated from fossil fuel-fired power plants with zero emissions electricity from a wind power plant. It is expected that when fully operated, the power plant will reduce 143,121 tCO<sub>2</sub> annually and 715,604 tCO<sub>2</sub> over the first crediting period of 5 years.

The project’s contribution to the sustainable development of the local area as well as the host country are as follows:

##### Contributions towards national sustainable development:

- In recent years, Vietnam has suffered a critical electricity shortage as a consequence of rapidly increasing demand and insufficient supply, thereby

imposing negative impacts on economic growth as well as on daily lives of people. This project activity will be a contribution towards balancing the supply and demand gap. By exporting electricity directly to the national grid, it will help to reduce electricity losses across the national grid and to lessen the risks of cascading national grid collapse due to overload.

- Reducing reliance on exhaustible fossil fuel-based power sources and also reducing the import of fuels for the purpose of power generation.
- Modern and highly efficient turbines and generators are being used in the project and the power transmission will be at high voltage to ensure low losses. The project will accelerate the deployment of renewable energy technologies in Vietnam.

Contributions towards local sustainable development:

- Economic well-being

Once commissioning, this proposed project will increase the industrial share in the economic structure of Gia Lai province. This proposed project will have a significant contribution to the state budget via annual taxes (i.e. corporate income tax, resources tax).

By supplying a stable electricity output, this project will facilitate the industrialization process of the province and support economic development of local villages through fostering tourism, trade and services inside the province. After commissioning, this project will supply electricity to speed up the commissioning of other large infrastructure projects in the region.

- Social well-being

The project improves existing roads, which will facilitate the transportation and travel. Thus, the project creates convenience for the transfer and trade in the area, thereby improves minorities' living standard and contribute to fill the gap in development between different ethnic groups in Viet Nam. This project will contribute directly to improve the low-quality infrastructure systems of the commune.

The project will construct a new transmission line together with the wind power plant, which will reduce electricity losses and improve the quality of electricity supply in the region.

The project activity could result in the employment of the local people for the construction and operation phases. Therefore, this project activity will contribute directly to alleviate poverty in the region.

**A.3. Summary of economic, social and environmental impacts of the Project**

>>

Assessment Questions/ Requirements	Justification of Relevance (Yes/potentially /no)	How Project will achieve Requirements through design, management or risk mitigation.	Mitigation Measures added to the Monitoring Plan (if required)
<b>Principle 1. Human Rights</b>			
<p>1. The Project Developer and the Project shall respect internationally proclaimed human rights and shall not be complicit in violence or human rights abuses of any kind as defined in the Universal Declaration of Human Rights</p> <p>2. The Project shall not discriminate with regards to participation and inclusion</p>	<p><a href="#">No</a></p>	<p>1. Viet Nam ratified “International Convention on the Elimination of all Form of Racial Discrimination” on 09/06/1981; “International Covenant on Civil and Political Rights” and “International Covenant on Economic, Social and Cultural Rights” on 24/09/1982; “Convention on the Elimination of all Forms of Discrimination against Women” on 27/11/1981. Therefore, the project developer and the project do respect nationally and internationally proclaimed human rights and shall not be</p>	<p>Not required</p>

		<p>complicit in violence or human rights abuses of any kind</p> <p>2. Viet Nam ratified “International Convention on the Elimination of all Form of Racial Discrimination” on 09/06/1981; “Convention on the Elimination of all Forms of Discrimination against Women” on 27/11/1981. Therefore, the project will not discriminate with regards to participation and inclusion.</p>	
<p><b>Principle 2. Gender Equality</b></p>			
<p>1. The Project shall not directly or indirectly lead to/contribute to adverse impacts on gender equality and/or the situation of women</p> <p>2. Projects shall apply the principles of nondiscrimination, equal treatment, and equal pay for equal work</p> <p>3. The Project shall refer to the country’s</p>	<p><a href="#">No</a></p>	<p>1. The project does not adversely affect men and women in marginalized or vulnerable communities because it creates stable jobs and incomes for local men and women. The project does not reduce or put at risk women’s access to or control of</p>	<p>Not required</p>

<p>national gender strategy or equivalent national commitment to aid in assessing gender risks</p> <p>4. (where required) Summary of opinions and recommendations of an Expert Stakeholder(s)</p>		<p>resources, entitlements and benefits because the project owner comply with the Labor Code (Chapter X – Separate provision for female employees).</p> <p>2. The project owner complies with regulations of Viet Nam law. Therefore, the project will not discriminate with regards to participation. The employees of the project are paid higher than the average monthly income per capita of the province. Men and women are paid equally for work of equal value.</p> <p>3. The project does not have any scope to apply gender strategy. Although the project positively contributes towards the national mission for empowerment of women through improvement of health and attaining vision for empowerment of</p>	
---	--	---	--

		women under Law on Gender Equality 2006 4. N/A	
<b>Principle 3. Community Health, Safety and Working Conditions</b>			
1. The Project shall avoid community exposure to increased health risks and shall not adversely affect the health of the workers and the community	<a href="#">No</a>	The project leads to safe working condition and improvement in health as it will replace coal as fuel with wind which is clean and safe. Further, periodic maintenance by implementing agency ensure prevention of any unsafe working condition.	Not required
<b>Principle 4.1 Sites of Cultural and Historical Heritage</b>			
Does the Project Area include sites, structures, or objects with historical, cultural, artistic, traditional or religious values or intangible forms of culture?  >>	<a href="#">No</a>	Project Area does not include sites, structures, or objects with historical, cultural, artistic, traditional or religious values or intangible forms of culture	Not required
<b>Principle 4.2 Forced Eviction and Displacement</b>			
Does the Project require or cause the physical or economic relocation of peoples (temporary or permanent, full or partial)?  >>	<a href="#">No</a>	Most of land area occupied by the project activity is poor forest land. Therefore, the project does not require or cause the physical or economic	Not required

		relocation of local people	
<b>Principle 4.3 Land Tenure and Other Rights</b>			
<p>a. Does the Project require any change, or have any uncertainties related to land tenure arrangements and/or access rights, usage rights or land ownership?</p> <p>b. For Projects involving land use tenure, are there any uncertainties with regards to land tenure, access rights, usage rights or land ownership?</p>	<u>No</u>	<p>The Project has been granted formal land use rights for site including the turbines area, transmission line and transformer station which are required by the project activity. The compensation plan and compensation expenditure were validated and approved by the Provincial People’s Committee. Therefore, there are no uncertainties related to land tenure arrangements and/or access rights, usage rights or land ownership</p>	Not required
>>			
<b>Principle 4.4 - Indigenous people</b>			
<p>Are indigenous peoples present in or within the area of influence of the Project and/or is the Project located on land/territory claimed by indigenous peoples?</p>	<u>No</u>	<p>There are no indigenous people present in or within the area of influence of the Project and/or the Project is located on land/territory claimed by indigenous peoples</p>	Not required
>>			

<b>Principle 5. Corruption</b>			
1. The Project shall not involve, be complicit in or inadvertently contribute to or reinforce corruption or corrupt Projects	<a href="#">No</a>	There is no corruption provision in the project activity.	Not required
<b>Principle 6.1 Labour Rights</b>			
<p>1. The Project Developer shall ensure that all employment is in compliance with national labour occupational health and safety laws and with the principles and standards embodied in the ILO fundamental conventions</p> <p>2. Workers shall be able to establish and join labour organisations</p> <p>3. Working agreements with all individual workers shall be documented and implemented and include:</p> <p>a) Working hours (must not exceed 48 hours per week on a regular basis), AND</p> <p>b) Duties and tasks, AND</p> <p>c) Remuneration (must include provision for payment of overtime), AND</p> <p>d) Modalities on health insurance, AND</p>	<a href="#">No</a>	<p>1. The project does not require labour force for implementation of the project. Trained technicians are involved in construction and operation and maintenance of plants. Therefore, no forced labour is involved in the project. No child labour is involved.</p> <p>2. Workers should have the right to establish and join the organization that they consider necessary in a climate of complete security based on Decree No.58/2014/ND-CP.</p> <p>3. The project owner follows regulations of Labour Code of Viet Nam. Thus, they always ensure the participation of women and men in</p>	Not required

<p>e) Modalities on termination of the contract with provision for voluntary resignation by employee, AND  f) Provision for annual leave of not less than 10 days per year, not including sick and casual leave.  4. No child labour is allowed (Exceptions for children working on their families' property requires an <a href="#">Expert Stakeholder</a> opinion)  5. The Project Developer shall ensure the use of appropriate equipment, training of workers, documentation and reporting of accidents and incidents, and emergency preparedness and response measures</p>		<p>project activities and benefits. The employees of the project are trained on technical aspects relating to the operation of the wind power plant and provided with labour contracts, medical insurance and regular health-check as well as social insurance and unemployment insurance.  4. Trained technicians are involved in construction and operation and maintenance of plants. Therefore, no child labour is involved.  5. Trained technicians are involved in construction and operation and maintenance of plants. The Project Developer ensure the use of appropriate equipment, training of workers, documentation and reporting of accidents and incidents, and</p>	
---	--	--	--

		emergency preparedness and response measures.	
<b>Principle 6.2 Negative Economic Consequences</b>			
1. Does the project cause negative economic consequences during and after project implementation?	<a href="#">No</a>	1. The project does not cause negative economic consequences during implementation process of the project	Not required
>>			
<b>Principle 7.1 Emissions</b>			
Will the Project increase greenhouse gas emissions over the Baseline Scenario?	<a href="#">No</a>	The Project will reduce the emission of 143,121 tCO2e/year compared to the Baseline Scenario as it replaces electricity generated from fossil fuel fired power plants with zero emissions electricity from the wind power plant.	Not required
>>			
<b>Principle 7.2 Energy Supply</b>			
Will the Project use energy from a local grid or power supply (i.e., not connected to a national or regional grid) or fuel resource (such as wood, biomass) that provides for other local users?	<a href="#">No</a>	The Project’s purpose is to supply clean energy from the wind power plant to the national grid. It does not use energy from a local grid or power supply or fuel resource that provides for other	Not required
>>			

		local users. The project will use their own generated renewable electricity for internal electricity consumption.	
<b>Principle 8.1 Impact on Natural Water Patterns/Flows</b>			
Will the Project affect the natural or pre-existing pattern of watercourses, ground-water and/or the watershed(s) such as high seasonal flow variability, flooding potential, lack of aquatic connectivity or water scarcity?	<a href="#">No</a>	The project is renewable energy technology and does not affect the natural or pre-existing pattern of watercourses, ground-water and/or the watershed(s).	Not required
>>			
<b>Principle 8.2 Erosion and/or Water Body Instability</b>			
a. Could the Project directly or indirectly cause additional erosion and/or water body instability or disrupt the natural pattern of erosion? b. Is the Project's area of influence susceptible to excessive erosion and/or water body instability?	<a href="#">No</a>	The project is renewable energy technology and does not affect Erosion and/or water body stability.	Not required
>>			
<b>Principle 9.1 Landscape Modification and Soil</b>			
Does the Project involve the use of land and soil for production	<a href="#">No</a>	The project activity is to generate	Not required

of crops or other products?		electricity from wind. It does not involve the use of land and soil for production of crops or other products. Before the operation, the project site is located partly on agricultural land. All the households who cultivated on the land had been compensated satisfactorily	
>>			
<b>Principle 9.2 Vulnerability to Natural Disaster</b>			
Will the Project be susceptible to or lead to increased vulnerability to wind, earthquakes, subsidence, landslides, erosion, flooding, drought or other extreme climatic conditions?	<a href="#">No</a>	The Project’s purpose is to supply clean energy from the wind power plant to the national grid. Therefore, the Project is not susceptible to and does not lead to increased vulnerability to wind, earthquakes, subsidence, landslides, erosion, flooding, drought or other extreme climatic conditions.	Not required
>>			
<b>Principle 9.3 Genetic Resources</b>			
Could the Project be negatively impacted by or involve genetically modified organisms or GMOs (e.g., contamination,	<a href="#">No</a>	The Project’s purpose is to supply clean energy from the wind power plant to the national	Not required

<p>collection and/or harvesting, commercial development, or take place in facilities or farms that include GMOs in their processes and production)?</p>		<p>grid. Therefore, the Project is not negatively impacted by the use of GMOs.</p>	
<p>&gt;&gt;</p>			
<p><b>Principle 9.4 Release of pollutants</b></p>			
<p>Could the Project potentially result in the release of pollutants to the environment?</p>	<p><a href="#">No</a></p>	<p>The project has received environmental clearance from the State Pollution control Board. Further the EHSS guidelines takes into account the same. The project does not lead to release of any hazardous substances that pose threat to the environment. Rather it aims at reducing the air pollution that is prevalent due to use of fossil fuel power plants. The project promotes environmental protection through the use of cleaner technology.</p>	<p>Not required</p>
<p>&gt;&gt;</p>			
<p><b>Principle 9.5 Hazardous and Non-hazardous Waste</b></p>			
<p>Will the Project involve the manufacture, trade,</p>	<p><a href="#">No</a></p>	<p>The Project’s purpose is to supply clean</p>	<p>The hazardous waste such</p>

release, and/ or use of hazardous and non-hazardous chemicals and/or materials?		energy from the wind power plant to the national grid. Therefore, the Project does not involve the manufacture, trade, release, and/or use of hazardous and non-hazardous chemicals and/or materials.	as waste oil will be collected in the waste bins with cover and labeled properly at sites. Regularly, the PO will contract with authorized parties for collecting and treating the hazardous wastes
>>			

**Principle 9.6 Pesticides & Fertilisers**

Will the Project involve the application of pesticides and/or fertilisers?	<a href="#">No</a>	The Project’s purpose is to supply clean energy from the wind power plant to the national grid. Therefore the Project does not involve the application of pesticides and/or fertilizers.	Not required
>>			

**Principle 9.7 Harvesting of Forests**

Will the Project involve the harvesting of forests?	<a href="#">No</a>	Therefore, the project does not involve the harvesting of forests.	Not required
>>			

**Principle 9.8 Food**

Does the Project modify the quantity or	<a href="#">No</a>	The Project’s purpose is to	Not required
---	--------------------	-----------------------------	--------------

<p>nutritional quality of food available such as through crop regime alteration or export or economic incentives?</p>		<p>supply clean energy from the wind power plant to the national grid. Therefore, the Project does not modify the quantity or nutritional quality of food available such as through crop regime alteration or export or economic incentives.</p>	
<p>&gt;&gt;</p>			
<p><b>Principle 9.9 Animal husbandry</b></p>			
<p>Will the Project involve animal husbandry?</p>	<p><u>No</u></p>	<p>The Project’s purpose is to supply clean energy from the wind power plant to the national grid. Therefore, the Project does not involve animal husbandry.</p>	<p>Not required</p>
<p>&gt;&gt;</p>			
<p><b>Principle 9.10 High Conservation Value Areas and Critical Habitats</b></p>			
<p>Does the Project physically affect or alter largely intact or High Conservation Value (HCV) ecosystems, critical habitats, landscapes, key biodiversity areas or sites identified?</p>	<p><u>No</u></p>	<p>The project is not located in an area within a high conservation value area or within critical natural habitats.</p>	
<p>&gt;&gt;</p>			
<p><b>Principle 9.11 Endangered Species</b></p>			
<p>a. Are there any endangered species</p>	<p><u>No</u></p>	<p>1. The physical location of the</p>	<p>Not required</p>

<p>identified as potentially being present within the Project boundary (including those that may route through the area)?</p> <p>b. Does the Project potentially impact other areas where endangered species may be present through transboundary affects?</p>		<p>project is described in Section A.4. above. There are no endangered species identified as potentially being present the project boundary.</p> <p>2. The project activity is not expected either potentially impact other areas where endangered species may be present through transboundary affects.</p>	
<p>&gt;&gt;</p>			

The project will positively contribute to the SDG as below:

Sustainable Development Goals Targeted	SDG Impact (defined in B.6.)	Estimated Annual Average	Units or Products
SDG 13: Climate Action (mandatory)	Emissions Reductions	143,121	tCO2e
SDG 8: Decent Work and Economic Growth	Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all (100% of the employees have access to training, healthcare, insurances and better income)	<ul style="list-style-type: none"> <li>400 workers during construction period</li> <li>36 staffs during operation period</li> </ul>	Jobs
SDG 7: Affordable and Clean Energy	Ensure access to affordable, reliable,	164,834	MWh of renewable energy generated

---

sustainable and modern  
energy for all

---

## SECTION B. INVITATIONS MADE TO STAKEHOLDERS

### B.1. Invitation tracking table

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease.

Category Code	Stakeholder Type/Organisation (if relevant)	Name of invitee	Male/Female	Method of invitation	Date of invitation (>30 days before Meeting)
A					
B					
C					
D					
E					
F	Gold Standard representative	<a href="mailto:help@goldstandard.org">help@goldstandard.org</a>	N/A	Email	
G					

#### B.1.1. Appropriateness of methods

>>

#### B.1.2. Gender Sensitivity

>>

#### B.1.3. Evidence proving invites took place as stated

>>

#### B.1.4. Sample content of invites (for each Method above)

>>

#### B.1.5. Description of other Means and methods to provide feedback for those who are not able to join the consultation meeting

>>

## SECTION C. REPORT OF THE CONSULTATION PROCESS

### C.1. Date of Meeting

#### C.1.1. List of participants

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease.

Date and Time		Location			
Category Code	Name of participant, job / position in the community	Male / Female	Contact details	Organisation (if relevant)	Signature

#### C.1.2. Pictures from physical meeting(s) (best practice)

>>

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease.

### C.2. Minutes of physical meeting(s)

>>

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease.

#### C.2.1. Minutes of other consultations

>>

Since the early stage of the project, the PO has been disseminating the project information and consulting the stakeholders as summarized in the below table. The minutes of these meetings are attached together with this SCR.

Date	Location	Participants	Topic	Feedback from stakeholder
31/10 /2019	Chu Don commune, Chu Puh	Representatives from	-Presenting about the planned project including the project information, implementation	- All the participants agreed with the project impacts and

	district, Gia Lai province	Communes, Towns, People	timeline, the economic, social and environmental impacts to the local area	contributions. The local stakeholders support for investing in the project as there is good potential for wind energy, the transportation and water supply infrastructure could be improved together with the project implementation.
30/10/2019	Nhon Hoa Town, Chu Puh district, Gia Lai province	Committee, community social organizations (CSOs), head of hamlets and local people	-Commitment from the project owner such as following the environmental protection, support to local area such as supporting in building houses for Vietnamese heroic mothers, veteran, donation to poor family to improve their economic condition. -The PO also commit to select the local construction companies, using local worker during construction period and recruit and train the local staffs for operating the power plant during operation phase.	- The occupied land are agricultural land for coffee and pepper planting and does not impact to the people residential area, forest.
29/10/2019	Ia Blu commune, Chu Puh district, Gia Lai province			
28/10/2019	Ia Phang commune, Chu Puh district, Gia Lai province			

**C.3. Assessment of comments from all consultations above**

Gender of Stakeholder	Stakeholder comment	Was comment taken into account (Yes/ No)?	Explanation (Why? How?)

Due to the ongoing Covid-19 pandemic and related laws against public gatherings in the host country, an LSC has not been conducted to date. As such, the Covid 19 Interim Measures are being applied and a self-assessment of Sustainable Development Goals and safeguards assessment are presented below.

C.3.1. Evaluation forms (best practice)

Name	
Gender – Male/Female:	
What is your impression of the meeting?	
What do you like about the project?	
What do you not like about the project?	
Signature	

**C.4. Summary of alterations based on comments**

>>

**SECTION D. CONTINUOUS INPUT / GRIEVANCE MECHANISM**

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease. At this stage, the project developer set up a continuous input and grievance mechanism as below. The stakeholders, especially communities around the project site, will be informed about the grievance mechanism and available methods for sharing inputs and concerns.

	<b>Method Chosen (include all known details e.g. location of book, phone, number, identity of mediator)</b>	<b>Justification of Choice (best practice)</b>
Continuous Input / Grievance Expression Process Book (mandatory)	The Grievance Expression Process Book will be placed at the project location in Chu Don commune, Chu Puh district, Gia Lai Province, Vietnam	Local stakeholder could give the comment directly to the Grievance Expression Process book. The PO will check the comments in the book on a regular basis, and record responses. They will be respectful to the views of stakeholders and suggest alternative solutions or compromises wherever possible
GS Contact (mandatory)	<a href="mailto:help@goldstandard.org">help@goldstandard.org</a>	
Telephone access (optional)	<ul style="list-style-type: none"> <li>Vu Thi Phuong: 0932555282</li> </ul>	Telephone contact for the representative of project owner was provided
Internet/email access	Email address for the	

(optional)	<ul style="list-style-type: none"> <li>Angus McEwin: <a href="mailto:amcewin@monsooncarbon.com">amcewin@monsooncarbon.com</a></li> <li>Vu Thi Phuong: <a href="mailto:phuongvt1@emiphudien.vn">phuongvt1@emiphudien.vn</a></li> </ul>	representatives of project owner was provided
Nominated Independent Mediator (optional)	N/A	It was decided to not nominate an independent mediator
Other	N/A	No other Continuous Input / Grievance Mechanism

## SECTION E. STAKEHOLDER FEEDBACK ROUND

Please check this box if the project is retroactive and has done only 1 consultation with a physical meeting intergrated into the SFR.

### E.1. Length of the Feedback Round

Stakeholder Feedback Round		Planned	Actual
Start Date	15/01/2022	<input checked="" type="checkbox"/>	<input type="checkbox"/>
End Date	15/03/2022	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### E.2. Summarise how all stakeholders were/will be invited to provide feedback

>>

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease.

### E.3. Summarise Feedback received, including if any changes in project design were made

>>

The project developer chooses to postpone physical stakeholder consultation meetings and the Stakeholder Feedback Round (SFR) for Gold Standard project/POA/VPAs until the COVID-19 situation ease.

## Revision History

Version	Date	Remarks
1.1	x October 2020	<p>Inclusion of Key Project Information</p> <p>Restructure, new headings and reorder to better match the steps a developer will follow in consultations.</p> <p>Removal of some non-mandatory template tables (Blind Sustainable Development Assessment). Clarification of best practice steps that are non mandatory processes, clarification of mandatory discussion points. Clarification regarding publishing names and that original evaluation forms (optional) and attendance lists (mandatory) should be separate documents.</p> <p>Improved clarity on Stakeholder Feedback round section and procedures for retroactive projects</p> <p>Provision of an <a href="#">accompanying Guide</a> to help the user understand detailed rules and requirements</p>
1.0	14 August 2017	Initial adoption
