**Review Completion Notification: Project 1721, ONIL Stoves Guatemala Uspantan**

Dear Erin,

Verra has completed its review of the above project (the “Project”) and taken it off hold in the Verified Carbon Standard (VCS) Program.

On 27 June 2024, Verra opened a new review of the Project pursuant to Section 6 of the *VCS Registration and Issuance Process, v4.5*, and sent review reports to the respective validation/verification bodies (VVBs). The VVBs responded to the reports and all findings are now closed.

The review concluded that 173,300 VCUs were issued to the project in excess of the correct amount. Under Section 6.1.5 of the *VCS Registration and Issuance Process, v4.5* the project proponent is responsible for compensating for this excess VCU issuance, which it has done through cancellation of a corresponding number of VCUs.

Verra expressly reserves all its rights in full, including its right to respond or take further action in accordance with the applicable Verra program rules and requirements, including the Verra Registry Terms of Use.

Sincerely,  
Jerry Seager  
Senior Director, Program Quality
