Re: Project 3812 Extension request for granted extension under Section 3.18.6

To Whom It May Concern:

We are writing with respect to the Painted Forest Carbon Project (Project ID 3812) to request an extension of the exemption that was granted for Section 3.18 under the VCS Standard v4.5.

An exemption was granted on 07 June 2024 on the condition that a project registration/verification request be submitted on or before 04 October 2024. This project is currently still undergoing validation and verification, and therefore it is not possible to submit a registration/verification request prior to 04 October 2024.

Based on this information, we are requesting an extension of the exemption from granted for Section 3.18.6 of this validation/verification.

Please let us know if you have any further questions.

Kind Regards,

Daniel Andres, Chief of Climate & Biodiversity Operations
