### 3 | Deviation detail

#### 3.1 | Description of the deviation:

GS 4817 is a retroactive project located in an industrial zone. Combined stakeholder consultation has been done in 2016, with a physical meeting. During the physical meeting, SFR process has also been explained and process (logbook, telephone numbers of project owners and emails of project owners and GS representatives has been provided to stakeholders.

Project registration request has been made in 2021 however, in the fifth round of review in April 2024, we have been requested to provide further detail (invitations, website screenshots) on SFR and VVB has been requested to verify those. Since SFR was completed in 2016 and LSC was approved in 2017 (screenshots of presentation handled in LSC are shared in annex), but VVB contracted in 2020, it has not been possible to access the website etc. as it is almost 8 years after physical meeting now.

Project has already been delayed due to reviews and additional comments which causes further loss of opportunities and may result in loss of certificates.

As a solution, we are recommending to redo the SFR but in order to prevent further delay, we request approval of GS for redoing SFR after registration but before verification is completed.
