Subject: Request to Correct Project Title for VPAs 39 and 40 under GS11189

Dear Gold Standard Team,

We write to request a correction to the project information displayed for the following VPAs under Gold Standard Project GS11189 – Improved Cookstove and Safe Water Programme – Kenya:

- VPA 39 – GS11189
- VPA 40 – GS11189

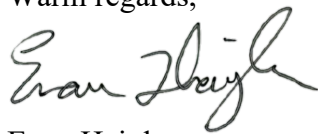

These VPAs are currently labeled as “Biogas – Electricity,” which is incorrect. Both activities are part of the Improved Cookstove and Safe Water Programme and should therefore be categorized under “Energy Efficiency – Domestic.”

The current labeling appears to be a typographical or classification error introduced by Gold Standard during data entry or migration, as no biogas or electricity-generating technologies are implemented under these VPAs. The correct category—Energy Efficiency (Domestic)—accurately reflects the technologies deployed and the methodology applied, which is the same as the other 100+ VPAs under this PoA.

We kindly request that the category be updated accordingly in the Gold Standard Registry and associated records immediately to ensure the project information accurately reflects its scope and activities.

Thank you for your attention and support.

Warm regards,

Evan Haigler
Chief Executive Officer
