

ENVIRONMENTAL SERVICES, INC.

Verification Statement Climate, Community and Biodiversity Project Design Standards (Third Edition – December 2013)

The Envira Amazonia Project: A Tropical Forest Conservation Project in Acre, Brazil

Issuance Date: 15 February 2016
Project No. VO14034.01

This verification statement confirms that Environmental Services, Inc. (Climate, Community & Biodiversity Alliance-Approved Verifier) has evaluated the Project Implementation Report (dated 28 January 2016) prepared by *CarbonCo* (Project Developer) for the Envira Amazonia Project, (validated PDD dated 05 March 2015) located in Acre, Brazil according to the criteria outlined by the Climate, Community and Biodiversity Project Design Standards (Third Edition - December 2013). This verification statement is consistent with ISO 14064-3:2006 and ISO 14065:2013. The climate, community and biodiversity benefits the project has delivered include: reduced deforestation and mitigation of associated greenhouse gas emissions, engaged local communities, hired a local project manager, began designing various projects and programs such as commercializing the collection of medicinal plants and granting land tenure, numerous vulnerable trees species and endemic bird species have been discovered, and the Project conserved the Project Area's rich tropical biodiversity. The dates of the period evaluated for this verification are 02 August 2012-31 December 2014.

Environmental Services, Inc. confirms all verification activities including objectives, scope, criteria, level of assurance, project description implementation, stakeholder interviews, monitoring report, and project implementation report adherence to the CCB Project Design Standards as documented in our report entitled *Climate, Community & Biodiversity Alliance Envira Amazonia Project Verification Report* dated 15 February 2016 are complete and concludes without any qualifications or limiting conditions that the *The Envira Amazonia Project – A Tropical Forest Conservation Project in Acre, Brazil* is without material discrepancy and that the verification activities provide a reasonable level of assurance. The Envira Amazonia Project's Implementation Report, dated 28 January 2016 meets the requirements of the Climate, Community and Biodiversity Project Design Standards (Third Edition – December 2013) and produces net climate (5,460,695 tCO₂e), community, and biodiversity benefits. The project also achieved all three Gold Level Benefits, including Climate Change Adaptation, Exceptional Community, and Exceptional Biodiversity Benefits.
