1.10 Conditions Prior to Project Initiation

The project activity is set up to produce clean power from the wind energy converters (WEC's) which can be also named as Wind Turbine Generator (WTG). The project activity involves supply, erection, commissioning and operation of 12 machines of rated capacity 2.1 MW. The project is Greenfield project. There was no project installed prior to commissioning of this project.

The purpose of the project activity is to utilize renewable wind energy for generation of electricity. The project activity replaces anthropogenic emissions of greenhouse gases (GHG's) into the atmosphere, which is estimated to be approximately 48,273 tCO₂e per year, by displacing the equivalent amount of electricity generation through the operation of existing fuel mix in the grid comprising mainly fossil fuel based power plants and future capacity expansions connected to the grid.

1.11 Compliance with Laws, Statutes and Other Regulatory Frameworks

Not Applicable.

1.12 Ownership and Other Programs

1.12.1 Right of Use

The project activity comprises of 12 WTGs with a capacity of 2.1 MW each owned by Mytrah Energy India Limited. For the ownership details of the project any of the following may be referred to:-

- Power purchase agreement

1.12.2 Emissions Trading Programs and Other Binding Limits

Project activity does not reduce GHG emissions from activities that are included in emissions trading program or any other mechanism that includes GHG allowance trading.

1.12.3 Other Forms of Environmental Credit

The project activity has not sought or received another form of GHG-related environmental credit.

1.12.4 Participation under Other GHG Programs

The project is registered under Clean Development Mechanism (CDM) of UNFCCC with 10 years crediting period (Reference No: 8823)¹. Crediting period of the project under CDM starts on 26^h December 2012 and ends on 25th December 2022.
