

# PROJECT REVIEW REPORT

<b>Project ID</b>	1190
<b>Project Name</b>	Wind power project in Gujarat
<b>Program(s)</b>	VCS Program
<b>Verification Period</b>	1 June 2018 – 31 March 2020
<b>Project Proponent</b>	Mytrah Energy (India) Limited
<b>Methodology</b>	ACM0002, Version 12.3
<b>Sectoral Scope(s)</b>	1. Energy industries (renewable/non-renewable)
<b>Validation/Verification Body (VVB)</b>	Earthood Services Private Limited
<b>Assessment Criteria</b>	VCS Standard, v4.0
<b>Date of First Issue</b>	16 November 2020
<b>Date of Final Issue</b>	20 November 2020

## Summary:

An accuracy review of the Wind power project in Gujarat verification approval request has been conducted by Verra in accordance with Section 4.3 of the *Registration and Issuance Process*.

The accuracy review has raised one assessment finding and no minor findings, detailed below. The VVB, in coordination with the project proponent, is hereby required to provide a response to the assessment findings presented in Section 1. The one assessment finding must be addressed to the satisfaction of Verra.

This project review report will be made publicly available. Confidential information may be provided as separate attachments.

## 1. ASSESSMENT FINDINGS

### Finding 1

Section 4.1.14 of the *VCS Standard, v4.0* states that “the validation/verification body shall use the *VCS Verification Report Template*...and adhere to all instructional text within the template.”

The *VCS Verification Report Template* instructs the VVB to provide a conclusion on the quantity of GHG emission reductions or removals achieved by the project.

Sections 1.1, 1.4 and 4.1 of the verification report state the net GHG emission reductions achieved during the monitoring period are 184,164 tCO<sub>2</sub>e, while the Summary and Sections 4.5 and 5 of the verification report state the GHG emission reductions achieved during the monitoring period are 184,173 tCO<sub>2</sub>e.

The VVB is requested to clarify the emission reductions achieved by the project during the monitoring period, and to update the verification report accordingly.

#### VVB Response:

The project activity has achieved 84,173 tCO<sub>2</sub>e emission reductions during this monitoring period. The inconsistency between ER values have been corrected now and ER achieved are now consistent throughout report.

#### Verra Response:

Sections 1.1., 1.4 and 4.1 of the verification report have been updated to include the correct volume of GHG emission reductions achieved during the monitoring period. This finding is closed and no further action is required.

## 2. MINOR FINDINGS

No minor findings were raised.

## 3. ASSESSMENT CONCLUSION

On 16 November 2020, Verra sent Earthood Services Private Limited the project review report with one assessment finding and no minor findings. The assessment finding was raised in regard to the inconsistent volume of GHG emission reductions achieved during the monitoring period stated throughout the verification report.

On 20 November 2020, Earthood Services Private Limited sent Verra an updated verification report and the project review report with a response to the assessment finding. The response was sufficient to close the review.

On 20 November 2020, Verra closed the review and approved the project’s verification approval request.
